all about people

Workers are worried about their future, creating pressure on governments and businesses

55% of people are worried automation and/or other innovations will take their job away.¹

37% of workers are worried about automation putting jobs at risk.²

60% think 'few people will have stable, long-term employment in the future'.²

30% of jobs at high risk of displacement by automation by 2030.³

Organisations are challenged to deliver productivity

€3 trillion in tech investment each year.⁴

79% of CEOs are worried about the availability of key skills- it's a 'top 3' concern for them.⁵

Growth in **workforce productivity**, by any measure, remains low.⁶

46% of CEOs say their first priority to remedy the issue is reskilling workers they currently have.⁵

The local context

38%

Of total workforce
are low skilled
workers.¹⁰

17.5%

Are early school
leavers.¹¹

7%

Of population aged
25 to 64 is
participating in
education and
training.¹²

Upskilling: learning new competencies to stay in current role, due to the change in skills required, or adding certain competencies for career progression, thereby fulfilling the talent needs of a rapidly changing economy.

Reskilling: learning new sets of competencies to transition to a completely new role.

A strategist's guide to upskilling, 2019

What do we mean by ‘Upskilling for the digital world’?

It's not just about Digital Skills

Upskilling is more than just providing access to training

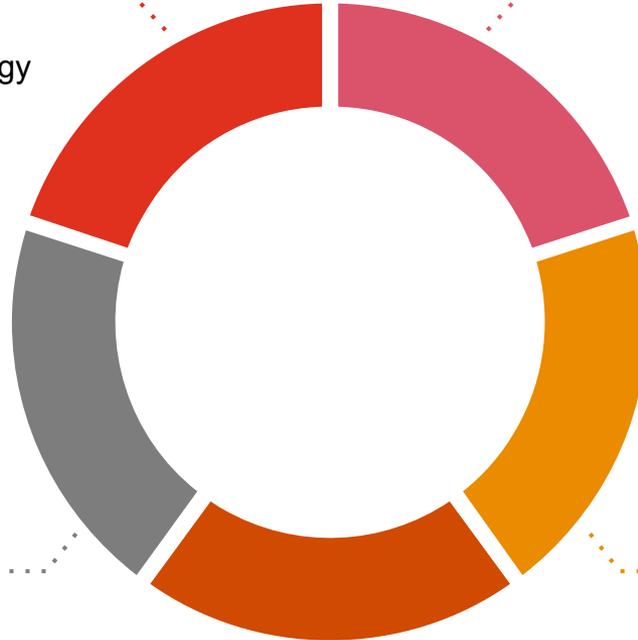

Planning for the 5 to 10% of roles that radically change annually

Why Upskilling?

Skills landscape

- To **enhance human skills** required for tasks which technology will not replace and to adapt mindset.
- To **support those whose roles to be transformed and those who will be displaced** due to a growing skills gap.

- To **develop digital skills to leverage technology** to avoid a skills gap hampering business growth and productivity.
- **Creation of new roles** and emerging professions which is set to increase its share of employment

Upskilling requirement

World Economic Forum Future of Jobs Report 2018 - 2022

54%

of all employees will require significant re- and upskilling.

35%

of these are expected to require additional training of up to 6 months

9%

will require reskilling lasting 6 to 12 months

10%

will require additional skills training of more than a year.

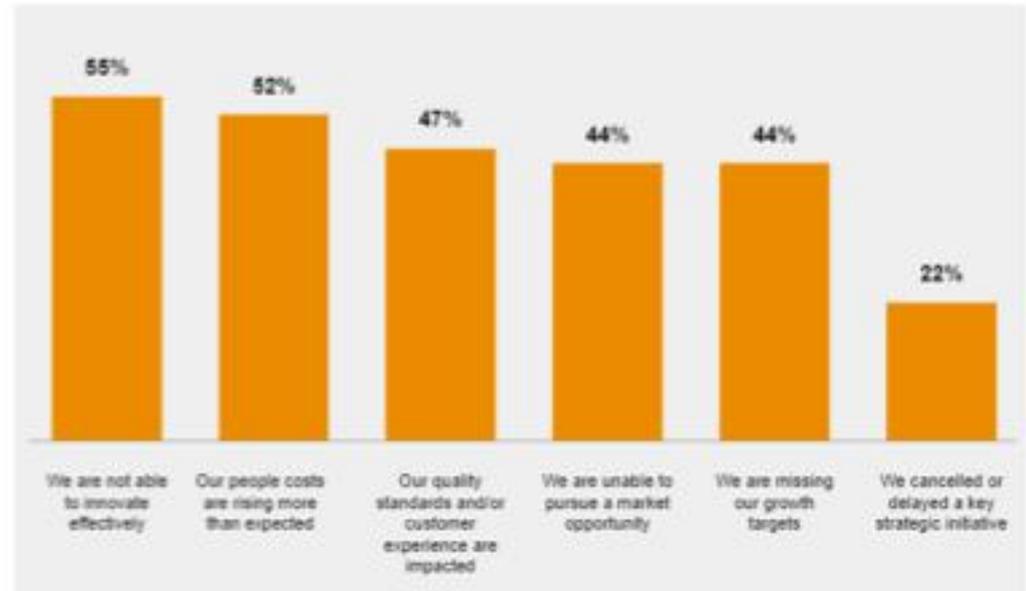

What could trigger your need to Upskill?

A lack of skills impacts business performance, innovation and pushes people costs

Question:

What impact is 'availability of skills' having on your organisation's growth prospects?

Source: PwC, 22nd Annual Global CEO Survey

Why Upskilling?

The expense of upskilling should be considered in the context of the alternatives:

- **Severance costs** for laid-off workers
- Time and costs involved in **finding, recruiting, and on-boarding new people** with the skills most in demand
- **Talent attraction** issues
- **Unproductivity** costs
- **Uncompetitive** costs

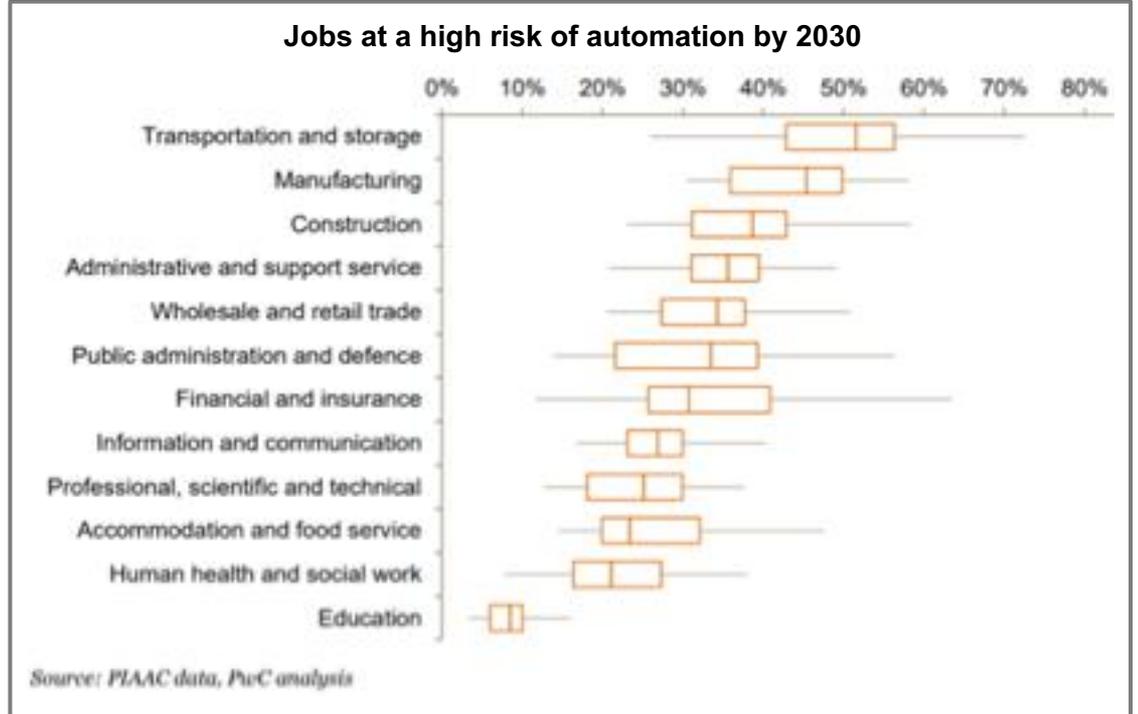

The upskilling need across industries

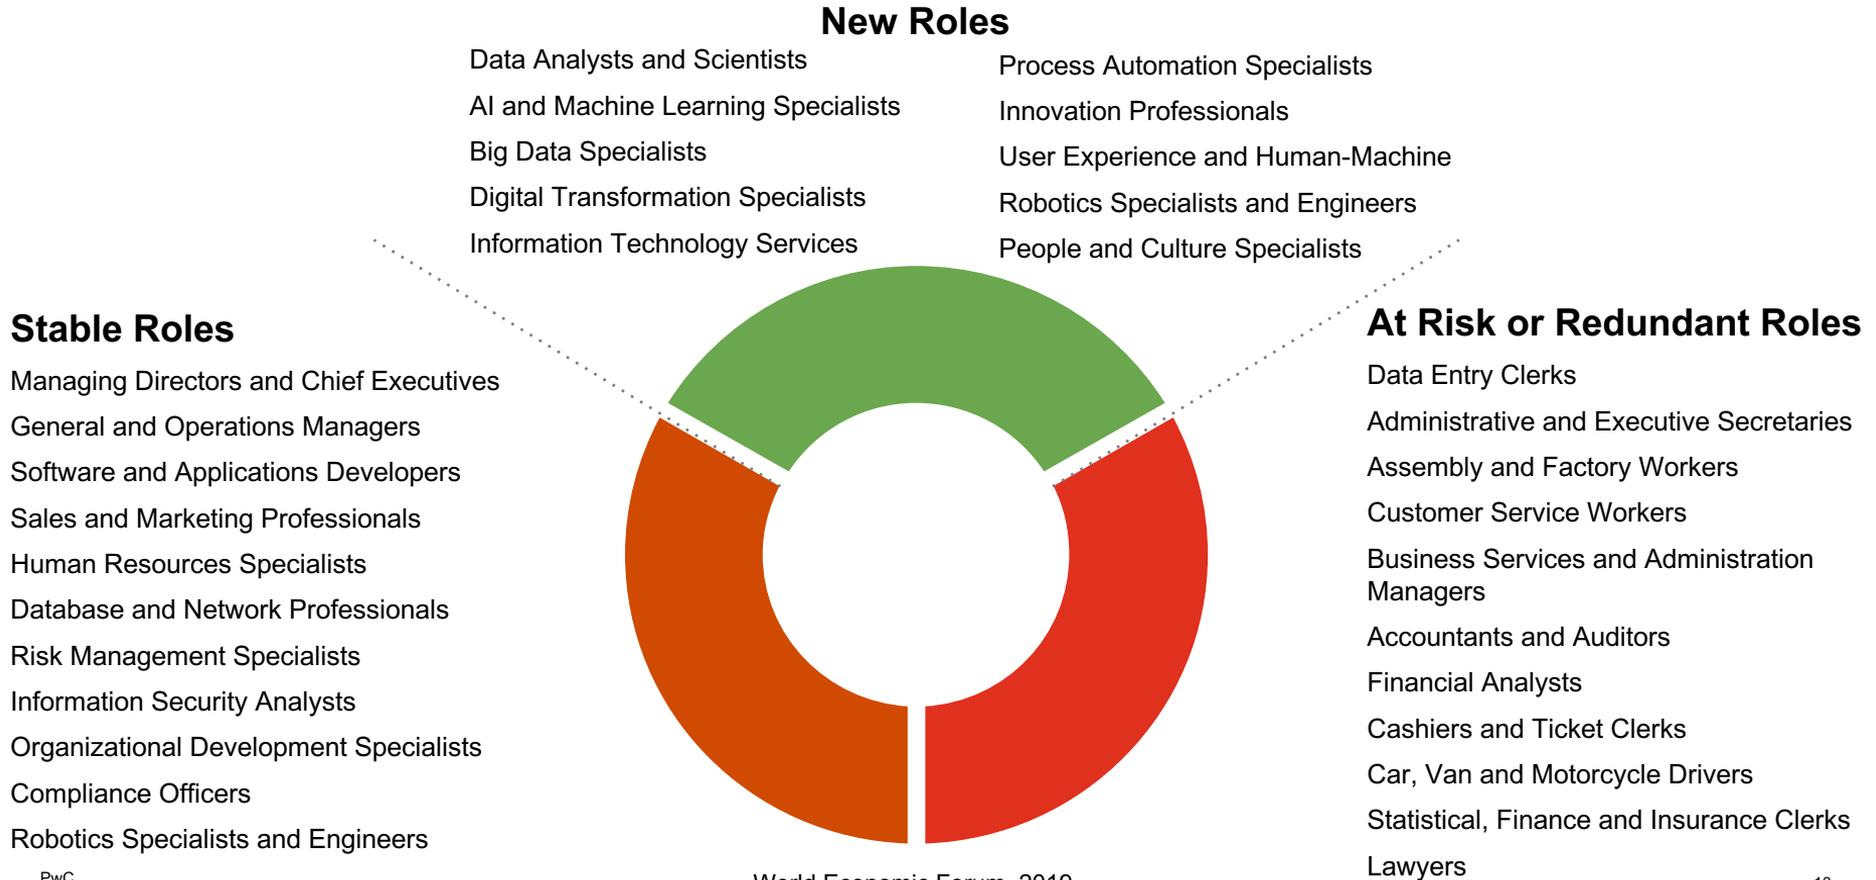

Technology requires new skills.

All parts of an organisation need new skills.

Organisations failing to deliver through current upskilling efforts.

Clusters of jobs in the digital age

Examples of companies investing in upskilling

L'ORÉAL

Already **15,500** employees have been upskilled through the Digital Upskilling Plan

Volkswagen

€160 million investment for upskilling staff.

Mobilised **55k people in US firm** to take ownership of their digital upskilling journey - now being rolled out globally

\$700 million in retraining its workers across the U.S.

A national priority

World Economic Forum - Recommendations from “Towards Reskilling Revolution Report”
2019

Leverage strategic
workforce planning

Conduct strategic workforce planning
Establish strategic skills mapping within jobs
Close management knowledge gap

Shape the future
talent pipeline

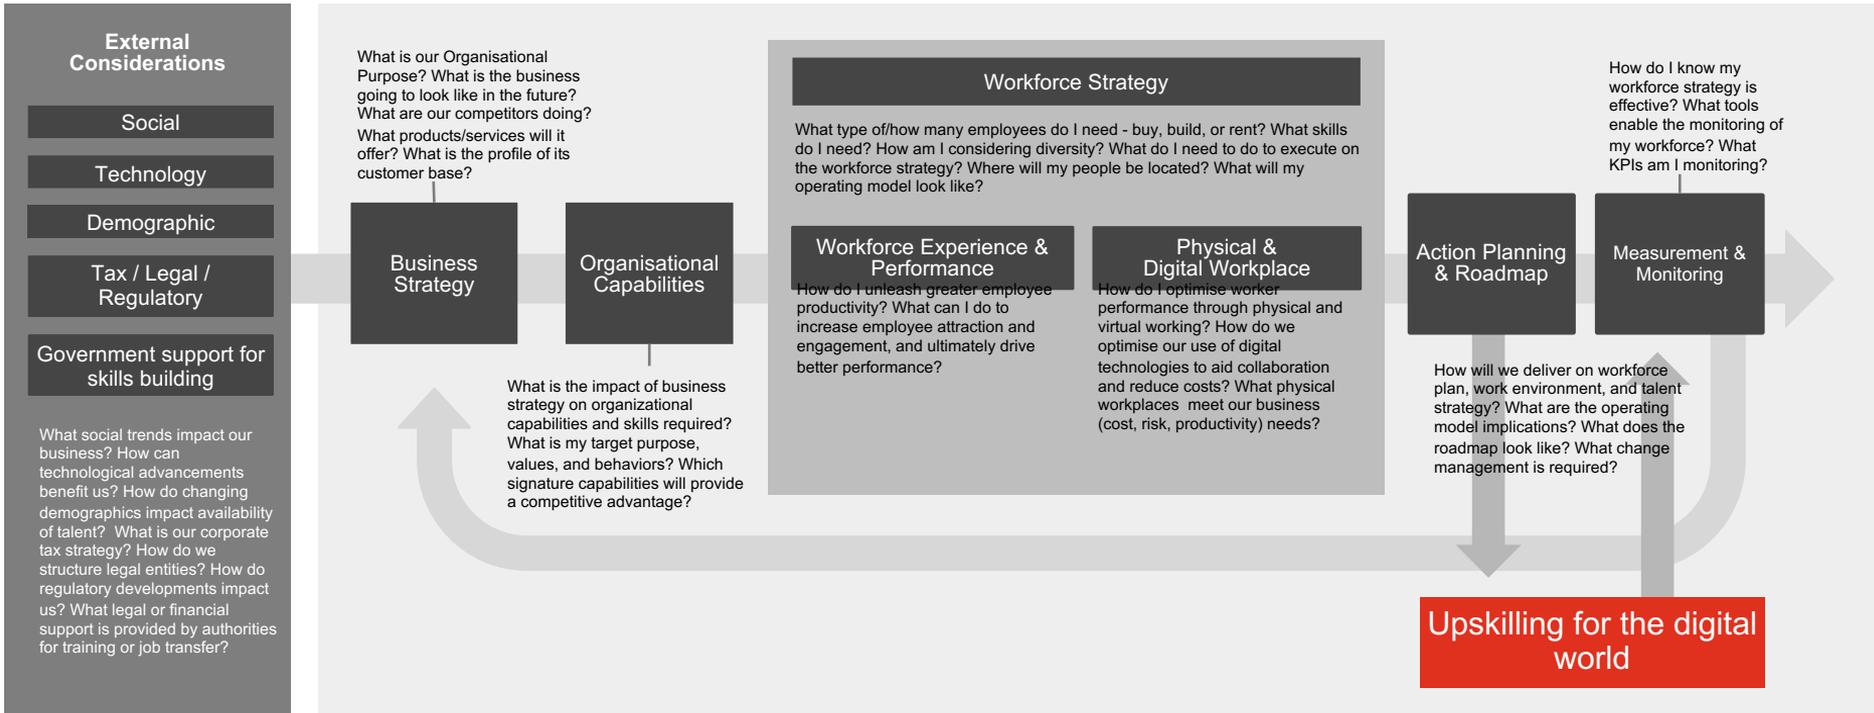

Develop targeted reskilling programmes
Upskill on a large scale
Homogenize skilling landscape
Align educational curricula with skills needs

Optimise talent
ecosystem
conditions

Rethink organizational structures
Transform culture to attract and retain next
generation talent
Develop a culture of lifelong learning
Boost diversity

Workforce of the Future Framework

L&D challenges

1. **Experiential learning that brings about a change in mindset from a fixed one to a growth/exponential mindset**
1. **A sharp growth curve at the speed of technology**
3. **Not in vacuum but in a digital context**

Characteristics of learning plans

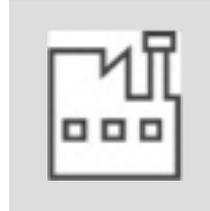

Mindset

Aims to change culture around digital, creating a digital mindset and digital-first approach to how organisations service their clients.

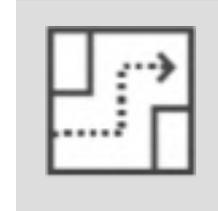

Blended

Includes classroom teaching together with additional e learning and online resources to address challenging topics and reinforce learning

Project Based

Project-based courses which will ensure participants put their newly acquired skills into action.

System Wide

A digital capability roadmap and learning planner that is aligned to business strategies and objectives

Upskilling a finance team for the digital age

Meet Joe:

Joe is a 30 year old accountant. He has studied hard at university to obtain his qualification and is progressing very well in his career however he needs to transform the way he works to remain relevant for his company. He also fears that his job of an accountant is changing and needs to prepare himself for this change.

Human Literacy Bootcamp

- Agile Project Management
- Change Management

Data Analytics Academy

- Power BI/Power Query
- Design thinking
- Innovation
- Digital Fitness App

Guided Simulation finance function sprint

Pilot sprint

Full Scale Deployment of defined processes

Design TNA & Case Studies

Change Mentoring

Total = 6 months

Project

Process & System Implementation

Transforming the semi-technical to technical

Meet Jake:

Jake has left MCAST 3 years ago with a diploma in Computer Engineering. He is passionate about emerging technology and would like to change his job and better his pay. He currently works as an IT support team member and handles a few IT projects.

Learning Sprint 2

- People management
- Data gathering
- Concepts of blockchain architecture

Learning Sprint 1

- Agile project management
- Design thinking
- Data governance
- Blockchain business foundation

Learning Sprint 3

- Emotional intelligence
- Cloud
- Critical thinking & problem solving
- Blockchain security principles

Building Blocks of Digital Transformation Checkpoint

Learning Sprint 4

- Systems design
- Business process – reengineering
- Working with the Ethereum platform

Learning Sprint 5

- Leading for change
- Data modelling
- Blockchain & data science

Learning Sprint 6

- Strategy for innovative & future technology
- Data analytics & visualisation

Final project presentation

Total = 6 months
2/3 week sprints

Change Mentoring

Projects Learning in Practice – Learning Platform

Upskilling manual labour for the digital age

Enhancing workforce mobility

Meet Anna:

Anna is a manual working in the food & beverage industry. She is described by the store manager as a very hard working person but has never had the opportunity to continue learning. Her company is now opening a new logistics centre in Żebbuġ with high end automation. The store manager would like to upskill Anna to be his safe pair of hands at the new depo.

Employee Plan

- Assess skills & aspirations
- Match the most suitable job
- Assess skilling apps

Skills Development Plan

- Workforce planning
- Competency profiling

Boot-camp Learning

- Digital skills
- Job related skills
- Human centric skills

On-boarding

Full Scale Deployment

Total = 3 months
